The global Underwater Glue and Adhesive Market size is valued at USD 1380 million in 2024 and is projected to reach USD 2505.5 million by 2032, registering a compound annual growth rate (CAGR) of 7.74% over the forecast period.

Underwater glue and adhesive market is growing steadily as industries seek reliable bonding solutions for underwater repairs, marine construction, and offshore infrastructure maintenance. These adhesives are formulated to cure underwater with strong adhesion to metal, concrete, ceramics, and composite surfaces. Applications include ship hull repairs, underwater pipeline sealing, bridge and dock maintenance, and aquarium installations. Manufacturers focus on developing epoxy and polyurethane-based adhesives with high chemical resistance and rapid curing properties. Growth is driven by rising offshore oil & gas activities, marine infrastructure investments, and emergency repair needs. However, challenges include application complexities and environmental impact concerns. Recent developments include Loctite introducing Marine Epoxy Putty Stick, a hand-kneadable adhesive designed for emergency underwater sealing and repairs with strong mechanical resistance and rapid curing, supporting maintenance teams in offshore and underwater environments efficiently.

Major trends include increasing use of underwater adhesives for rapid repair and maintenance of ship hulls, pipelines, bridges, and offshore structures without the need for dry-docking or surface preparation.

Growth is driven by rising marine infrastructure development, offshore oil & gas operations, and aquaculture installations requiring durable and water-resistant bonding solutions.

Key challenges include application complexity in strong currents, environmental concerns regarding chemical leaching, and limited bonding performance under extreme temperatures or pressures.

Companies are developing epoxy and polyurethane-based adhesives with rapid curing, strong adhesion to wet substrates, and improved chemical resistance for diverse underwater applications.

Recent developments include Loctite launching its Marine Epoxy Putty Stick designed for emergency underwater repairs, featuring strong adhesion, mechanical resistance, and easy application for offshore maintenance teams.
