## **Abstracts**

OGAnalysis's widely renowned study on United Kingdom refining industry (2016) focuses on the emergence of gasoline, diesel, fuel oil and LPG supply/demand balances in near to long term future. As lower crude prices continue to cause delays and cancellations of refinery projects worldwide, the research work analyzes the progress of refining projects, investment environment, plant closures, margins and pricing trends in United Kingdom.

With refiners worldwide focusing on expanding capacities in demand centers, the report evaluates the drivers and challenges of operating and investing in United Kingdom refining industry. The report observes that the United Kingdom refining capacity (CDU) is expected to remain unchanged at 1,510 Kb/d.

Exxon Mobil corporation dominates the refining industry in United Kingdom, with the highest market share in the country.

The United Kingdom refining report provides refinery wise CDU, coking, FCC and Hydrocracking capacity outlook along with details of all operational and planned refineries including location, startup, current status, companies and capex details.
