Video Wall market overview –

Video Wall market illustrates an attractive growth rate during the forecast period with the advancements in technologies. Latest developments in Artificial Intelligence and machine learning abilities to expand Video Wall applications and drive demand during the forecast period to 2028.

The pandemic COVID 19 has a significant impact on the manufacturers of Video Wall due to disruptions in the supply chain and frequent lockdowns. Further, the economic slowdown and geopolitical matters have limited the Video Wall market growth in 2020. As the market recovers from the pandemic, we forecast the growth trajectory to vary across regions with some countries offering huge growth potential while others reporting limited profit margins.

New generation Video Wall with improved performance offering higher accuracy and flexibility, with easy integration into systems spur the growth in Video Wall industry. However, a paradigm shift towards a connected world and growing requirement for miniaturization are necessitating further advancement in the Video Wall market and develop smarter products.

Research and development in the Video Wall industry to drive down costs and improve functionality are expected to advance in the medium term. Autonomous vehicles poised to hit the mainstream alongside rapid growth in AI computing capabilities with improving commercials are offering enormous opportunities in the Video Wall market. Over the forecast period to 2028, we forecast the Video Wall market to regain growth momentum,

mainly with support from developing markets.

Video Wall market competitive landscape–

On the Video Wall market structure front, consolidation observed in 2020 is expected to be continued in 2021. Mergers and acquisitions are primarily intended to acquiring new technologies, strengthening portfolios, and leveraging capabilities.
