Abstracts

The best selling research publication from leading industry player- OGAnalysis presents comprehensive outlook of the transforming energy future. It provides unique perspectives on wide range of energy demand issues confronting the global markets. In particular, with oil prices trading above \$60 per barrel, understanding the fuels that will prevail in the future remains vital for success. Thus, this research work is organized to provide insights and demand outlook for each of the energy fuels including oil, gas, coal, solar, wind, hydro and nuclear energy fuels.

The report also enables its readers to reformulate their strategies on the basis of different approaches taken by significant players in the industry to cope up with the rapidly changing dynamics in energy market.

To further identify the potential growth markets for each fuel, the report also presents region wise oil, gas, coal, solar, wind, hydro and nuclear demand outlook to 2025. Further, key trends comparing the fuels and future developments in both conventional and renewable energy fuels are included in the research publication.

Clients can upgrade and improve knowledge on the industry amidst strong wave of investments in renewables and fundamental shifts in energy mix. Cost comparison and new trends in renewable energy fuels and opportunities ahead are included for further understanding.
