Abstracts

Anesthesia monitoring devices include a large array of devices that are used to monitor the delivery of fluids, drugs and gases to the patient. The devices help to monitor and measure vitals of patients to ensure the safety. The rise in geriatric population and increasing rate of surgeries around the world is the major driving factor for the market. The physician acceptability and awareness about such devices has increased the adoption of anesthesia monitors across the globe. Moreover, the demand for safe and standard equipment and medical facilities is at all-time high, such demand is also propelling the market. The extended support of government in terms of funding and supportive regulation will create huge opportunities to growth of the market. the research and development for bringing more advanced monitoring systems such as integrated anesthesia workstation will also contribute significantly in market growth.

The market is divided into North America, Europe, Asia Pacific and Rest of the World geographically. The North American region leads the market of anesthesia monitoring devices due to its advanced infrastructures, rising trends in geriatric population and awareness about the anesthesia monitoring devices. The Asia pacific region is expected to grow significantly in forecasted period due to the favorable regulations and increased government funding for development of advanced healthcare infrastructures. The Europe region holds the second place in anesthesia monitoring device market, the region also inhibits advance infrastructure and large number of companies.

The company engaged in Anesthesia monitoring devices market provides various types of equipment such as pulse oximeter, capnographhs, ventilators, integrated workstations and so on. The presence of large array of companies in the segment makes the market highly competitive. The major players in the segment are GE healthcare, Philips N.V, Drägerwerk AG & Co. KGaA. The other key players in market

are BPL Medical Technologies, Covidien PLC, Criticare Technologies, Inc, Disposed Ltd, Dixon GmbH, Edan Instruments, Inc, Fukuda Denshi, GE Healthcare, Infinium Medical, Invivo, Masimo, Medacx Ltd, Medtronic and so on.

RESEARCH METHODOLOGY

The market study of Global Anesthesia monitoring devices market is incorporated by extensive primary and secondary research conducted by research team at OMR. Secondary research has been conducted to refine the available data to breakdown the market in various segments, derive total market size, market forecast and growth rate. Different approaches have been worked on to derive the market value and market growth rate. Our team collects facts and data related to the market from different geography to provide a better regional outlook. In the report country level analysis is provided by analyzing various regional players, regional tax laws and policies, consumer behavior and macro-economic factors. Numbers extracted from Secondary research have been authenticated by conducting proper primary research. It includes tracking down key people from the industry and interviewing them to validate the data. This enables our analyst to derive the closest possible figures without any major deviations in the actual number. Our analysts try to contact as many executives, managers, key opinion leaders and industry experts. Primary research brings the authenticity in our reports.

Secondary sources include:

Financial reports of companies involved in the market
Authentic Public Databases (org, gov and other such websites)
Whitepapers, research-papers and news blogs
Company websites and their product catalogue.

The Report is intended for Researchers in healthcare segment, Emerging companies and researchers in the market, Investing companies, Government Organizations for overall market analysis and competitive analysis. The report provides in-depth analysis on market size, growth opportunity in market, product types. The report will serve as a source for 360-degree analysis of the market thoroughly integrating different models such as PEST analysis, Porter five analysis delivering insights into the market for better business decisions.

MARKET SEGMENTATION:

Global Anesthesia monitoring devices Market is segmented on the basis of various regions and below mentioned segments:

Global Anesthesia monitoring devices Market Research and Analysis, By Monitoring required

Global Anesthesia monitoring devices Market Research and Analysis, By Products

Global Anesthesia monitoring devices Market Research and Analysis, By End Users

THE REPORT COVERS:

Comprehensive research methodology of Global Anesthesia monitoring devices market

This report also includes detailed and extensive market overview with key analyst insights.

Exhaustive analysis of macro and micro factors influencing the market guided by key recommendations.

Analysis of regional regulations and other government policies impacting the Global Anesthesia monitoring devices

Insights about market determinants which are stimulating the Global Anesthesia monitoring devices

Detailed and extensive market segments with regional distribution of forecasted revenues.

Extensive profiles and recent developments of market players.
