Abstracts

The key factors contributing to the growth of the global biomarker market include high prevalence of chronic diseases, rising adoption of biomarker for diagnostic applications, high government funding for cancer research and clinical trials, increasing application in drug discovery and development. High investments cost and low-cost benefit ratio and technical issue such sample collection and storage are restraining the growth of the biomarker market. however, introduction of new technologies such as digital biomarker and rising adoption in personalized medicine are creating opportunities for the market.

The global biomarker market is segmented on the basis of type, application, disease and end user. On the basis of type, the market is bifurcated into genomic and protein biomarker. The application segment is bifurcated into drug discovery and development, diagnostic, prognostic, predictive and others (risk assessment). The disease segment is bifurcated into cancer biomarker, cardiac biomarker, renal biomarker, central nervous system disease and others (NASH). The end user segment is bifurcated into hospitals, diagnostic centre and research institute.

The global biomarker market is further analyzed on the basis of the geographical regions that are contributing significantly towards the growth of the market. North America holds a dominant position in the global biomarker market, followed by Europe. This is mainly due to high prevalence of chronic diseases and rising adoption of biomarker technology for diagnostic applications significantly contributing towards the market growth in the region. The Asia pacific is projected to exhibit the fastest growth in the global biomarker market over the forecast period. This is due to high government funding for cancer research and clinical trials and high prevalence of chronic disease.

Some of the key players operating in the global biomarker market are Abbott

laboratories, Qiagen NV, PerkinElmer Inc., Bio-Rad laboratories and others. In order to sustain in the competitive market, these players adopt various strategies such as Acquisitions, mergers, expansions, joint ventures and product development for the growth of the market.
