Abstracts

Global pen needle market is anticipated to grow at a significant CAGR during the forecast period. Factors that will affect the growth of the market include advancement of insulin pens over syringes and vials and growing number of diabetic patients across the globe. Pen needles are utilized as a part of conjunction with injection pens to convey injectable medication into the body. A pen needle comprises of an empty needle which is installed in a plastic center and joins to infusion pens. They are ordinarily utilized by individuals with diabetes who frequently require various day by day insulin infusions. The market is segmented of type, therapy, and mode of purchase. On the basis of type the market is segmented into standard and safety pen needles. By therapy, the pen needles market is segmented into insulin therapy, glucagon-like-peptide-1 (GLP-1) therapy, and growth hormone therapy. Based on the mode of purchase, the pen needles market is segmented into retail and non-retail modes of purchase.

Geographically, the pen needle market is divided into North America, Europe, Asia-Pacific, and the Rest of the World. North America and Europe are expected to have a significant market share in 2017 due to the presence of a large pool of aware diabetes.
