## Abstracts

Pericardial disease is a medical condition which involves the swelling and irritation in the pericardium or says, fibroelastic sac. The pericardium is a two-layer sac that separates the heart from surrounding structures and protects it from vibration and external shocks. The patient with heart surgeries and other related surgeries become more vulnerable to such diseases. The rising number of geriatric population and prevalence of cardiovascular diseases is the major factor for the growth of the market. The exposure to radiation and infectious diseases can be attributed as another factor motivating the market growth. The high cost of diagnoses such as cardiac MRI and cardiac CT scan, however, hinders the market growth. Moreover, lack of awareness regarding the treatment of such disease is another factor that restrains the market growth. The technological advancement for providing more cost-effective and minimally-invasive diagnosis such as the introduction of grafts developed with dCELL technology is expected to create room for the growth of the market. the government funding in R&D, especially in emerging economies such as India and China, contributes to market growth. The extended support of the government in terms of funding and technological advancement for development of more precise and cost-effective diagnostic device further anticipated propelling the market growth in the near future.

Geographically, the market is analyzed into North America, Europe, Asia-Pacific, and Rest of the World. North America contributes the largest share in the global pericardial disease market, followed by Europe. This is mainly due to its advanced medical facilities and the rising number of cases for cardiovascular disease. Moreover, the region has a large number of geriatric populations; hence, propelling the demand for minimally-invasive cardiac disorder treatment in the region. Asia-Pacific is projected to witness the fastest growth in the global pericardial disease market due to the rapid development of the healthcare industry and the rising cases of diseases due to sedentary lifestyles.

Some of the key players operating in the global pericardial disease market are AliveCor, Inc., AstraZeneca PLC, Bayer AG, CardioComm Solutions, Inc, Integra LifeSciences Corp., Teva Pharmaceutical Industries Ltd., PerkinElmer Inc., Pfizer Inc., and VectraCor, Inc., among others. Product launch, merger & acquisition, and partnerships are some of the key strategies adopted by the market players and sustain and capture the major market share in the pericardial disease market.
