Market Insights

The Global Prostate Cancer Market is expected to grow at the CAGR of 10.2 % during 2017-2022. The market is growing impressively due to rise in incidence and prevalence rate of prostate cancer, robust R&D exploration and rising investment in grants and investment across the globe. Prostate cancer is an androgen-dependent disease that responds to medicine and treatment in the initial stages, however in the later stages it becomes resistant to therapies and other treatments. There are certain risk and causes of prostate cancer which includes age, ethnicity, family history and genes, being overweight or obese, IGF-1 (Insulin like growth factor), vasectomy, inflammation of the prostate and so on. Prostate cancer results into abnormal and uncontrolled growth of cells in prostate gland of men. It majorly affects men of developed region with age 50 and above. The U.S. contributes highest in prostate cancer market due to prevalence of prostate cancer and adoption of innovative surgeries and treatments. According to WHO, in 2012 more than 14 million new cases of cancer and 8.2 million cancer fatalities were registered. The trend is expected to continue with new cases to increase over 70%. Early diagnosis, innovative treatment methods and quality care of the patients may enable to survive prostate cancer patients.

Global rise in prostate cancer and adoption of minimally invasive surgeries are driving the market growth across the globe. There are other factors that are boosting the market growth of Global Prostate Cancer Market it includes R&D, rise in grants and funding, increasing adoption of personalized medicines, growing pharmaceutical industries and so on. Rising diagnostic centers across the globe, investment from government and private players have bolstered the market growth. Successful clinical trials and FDA approval will influence the prostate cancer market in near future.
