Abstracts

The Global tennis ball machine market is expected to grow at a CAGR of 5.8 % during 2017-2022. A tennis ball machine is a mechanical device that automatically throws out tennis balls at different speeds and angles. Its main purpose is to help players to develop their ball hitting technique. New technology and feature enabled machine are attracting players. Tennis is a racket sport that can be played individually against a single opponent (singles) or between two teams of two players each (doubles). The object of the game is to play the ball in such a way that the opponent is not able to play a valid return. Nowadays machines are designed in such a way that it provides all type of shot with various angles. Players can set how he/she want to practice and the machine runs accordingly. New feature such as remote controlling, random oscillations (horizontal and vertical), speed variation are driving the tennis ball machine market.

The market of global tennis ball machine is boosting at a high rate owing to increasing number of celebrity endorsements, is one of the most important factors driving the growth of this market globally. Launching campaigns related to tennis and promoting products by famous players is an old and effective marketing strategy undertaken by most tennis machine manufacturing companies. Tennis players such as Roger Federer, Andy Murray, Rafael Nadal, and Serena Williams are promoting products of leading market players. Moreover, vendors sponsor various tennis tournaments and matches as part of their product promotions. This increase in promotional activities is likely to propel the growth prospects for this market over the predicted period. Besides parents, many educational institutions have started encouraging children to take up sports like tennis actively. Since these institutes help students with proper training and guidance, the demand for tennis ball machine will increase substantially over the next few years.

Thought tennis ball machine cannot replace human trainer in terms of training and

practice. On the other hand, high cost of such machines acts as a barrier to the growth of the global market. But, rising number of tennis players and overgrowing demand of tennis sports in Asia Pacific region may enhance the global tennis machine ball market in forecasted time.

Geographically market is divided into North America, Europe, Asia-Pacific and Rest of the World. North America is having the highest market share in this market owing to over growing popularity of tennis in this region and adoption of tennis sports in many schools and colleges as major sports. Many market players also belong to the North American region. Asia Pacific market is showing lucrative growth majorly due to rising tennis players, increasing knowledge related to the tennis game and so on this directly enhance the Asia Pacific market.
