Market Insights:

The Global ultrasound market is expected to grow at a CAGR of 5.1 % during 2017-2022. Ultrasound is a sound or other vibrations having an ultrasonic frequency, which is particularly as used in medical imaging. Ultrasound market is growing at a faster rate owing to increasing prevalence of chronic and infectious diseases such as CVDs (cardiovascular diseases) and cancer, Increasing global geriatric population base, Growing incidences of injuries in muscles, tendons, vessels, joints and other internal organs, rising global population base (birth rate), rising number of hospitals and rapid introduction of high efficiency imaging products in the market, Rising demand for minimal invasive and non-invasive diagnostic procedures coupled with innovation in technology are projected to drive ultrasound market over the next five years. On the other hand FDA regulations towards healthcare equipment's, lack of skilled and expertise technicians and high cost of ultrasound machineries acts as a hindering agent. Though growing healthcare expenditure and emergence of point of care ultrasound devices may boosts the market in upcoming time period.

Geographical Insights

Geographically market is divided into North America, Europe, Asia Pacific and Rest of the World. Europe is having the highest market share of global ultrasound market owing to increasing market penetration of therapeutic ultrasound, increase in the number of products being commercialized, growing emphasis on minimally invasive procedures (including diagnostic and therapeutic ultrasound), expansion in clinical applications of HIFU (high intensity focused ultrasound). European region is followed by North America. On the other hand APAC region is the fastest region in global ultrasound

market majorly due to increasing number of age-related illnesses, expansion and modernization of healthcare infrastructure, growing public awareness about therapeutic benefits offered by ultrasound and increasing focus of international device manufacturers on strengthening their distribution networks in this region. India, China, and Japan are the major countries in APAC region.
