MARKET INSIGHTS:

Global Medical Lifting Sling Market is expected to grow with a CAGR 12% during 2016-2021. Global Medical Lifting Sling Market is segmented on the basis of product, material, type, end user and geography. The pivotal factors for the modest growth of Global Medical Lifting Sling Market includes the rising amputees, aged and disabled populations across the globe. The rising life style oriented diseases such as CVD, CHD, Cancer, Bariatric and Obesity are driving the market. Wide range of products and adoption from end users are boosting the medical slings market. Significant development and progress in research and development and innovation in medical slings are driving the market.

Other Key factors that are driving the global Medical Lifting Sling Market includes technological advancement and innovation, easy availability of resources & supplies and favorable government policies. Innovation, partnership and product launch are the key strategy adopted by key players of Global Medical Lifting Sling Market. Exploration through R&D is expected to create huge demand for Medical Lifting Sling Market. Medical lifting slings are widely adopted in hospitals, homecare, research institutes, clinics and other healthcare institutes. Medical lifting slings such as transfer slings, toileting lifting slings and standing slings are recognized by health care professionals for providing exceptional fit and durability. There are variety of medical slings available in the market that are designed to fulfil specific requirement of the client for example transfer sling styles and sizes are accommodate virtually any ceiling or floor lift, positioning, and transfer requirement.

Customization services are expected to boost the global medical lifting sling market.

However, high cost of medical lifting slings and strict medical device regulations are concern for the global medical lifting sling market. Global Lifting Slings are made up of good quality of material such as nylon, canvas and mesh which are designed specifically according to the need of the patient. There are various medical slings such as transfer slings, hammock slings, universal slings and bariatric slings are manufactured from durable nylon mesh, polyester fabrics, and quilted padding to provide effective support, comfort, and safety to patient. All the medical lifting slings contain no metal parts or other stuff that may irritate the patient.

GEOGRAPHICAL INSIGHTS

North America generates highest revenues across the globe due to huge adoption of Global Medical Lifting Sling products and huge adoption of medical slings by end users such as hospitals and home healthcare.
