Abstracts

License Price: US\$ 2,490.00

Introduction

Virtualization and data center transformation activity hold the promise of reducing data center costs, and improving efficiency and utilization. CiRBA's enterprise data center analytics platform can provide accurate, actionable information for maximizing efficiency across all major platforms for physical, virtual, and cloud infrastructure for both transformation and ongoing efficiency activities.

Features and benefits

Supports data acquisition across heterogeneous infrastructure platforms.

Incorporates organization-specific technical, business, and workload constraints.

Strength and variety of analytical capabilities.

Impressive, business-oriented reporting/visualization, with drill-down capabilities.

Highlights

CiRBA can provide the capabilities that enable organizations to successfully plan for virtualization and consolidation, and to make the right strategic, technology, and purchase decisions. CiRBA can solve the challenges of efficiency management. It balances workload demand against infrastructure supply to ensure that workloads have the right level of resources, by applying rule-based policies, advanced workload

algorithms, and multi-dimensional "what-if" analysis.

Your key questions answered

Appropriate to organizations looking to make the right strategic, technology and purchase decisions when planning for virtualization and consolidation

CiRBA should be considered by enterprises seeking to solve the challenges of efficiency management in complex IT infrastructures.

CiRBA is also applicable to organizations that are keen not to increase risk or complexity, or the overall costs for IT infrastructure operation.
