Abstracts

This is the first of two reports that present the combined thinking of the Ovum telecoms research group on the subject of what the telecoms industry will look like in the year 2020.

Contents

Executive summary
In a nutshell
Ovum view
Scope
Shaping the world of 2020
A decade of change: the wheels are in motion
The most powerful engine: Internet protocol
Five key drivers of change
Growth in IP video
Going mobile
Explosion of connected devices
The rise and rise of software
SMART equals power players
The world beyond telecoms providers
Sources
Economy
Politics and geopolitics
Businesses
Social trends
Developed countries
Successful developing countries
Less successful developing countries
Technology developments
Resources and environment
The evolution of customer requirements
The shift to wholesale
Retail customers
Consumer behaviour
Customer segmentation
Enterprise customers
Customer segmentation
Enterprise end users are consumers
The world adjacent to telecoms providers
Networks are no longer just about telcos
2010–20: convergence a reality
From vertical to horizontal integration
Phase one: the rise of open, but managed platforms

Phase two: horizontal in full force

A more level playing field

Legal and regulatory issues

Redefining the telco: recognisably different

LEAN and SMART: the two faces of telecoms

The evolution of the SMART role

Early SMART players in evidence today

SMART models will take longer to develop in the wireline market

Despite separate evolutions, both SMART models will combine

LEAN operator: the main role for telcos in 2020

LEAN requires scale and investment

SMARTness is a bonus for telcos, not a birthright

'Smart enabler' underpins LEAN and SMART operators

A difficult road to tread

The provision of complete software platforms is not a core telco competency

Few operators can become SMART themselves

LEANness brings its own benefits
