Abstracts

Safety and security in the home are much broader than burglar and fire alarms. In addition to these long-term mainstays, consumers can add access control features and cameras to their protection systems for convenience as well as safety. This report assesses the current varied smart home devices that provide security and safety in the home as well as new devices in development. The report assesses key industry players, market drivers, and industry trends in security devices and provides five-year forecasts for security devices and cameras.
