Abstracts

Voice can provide a simple, compelling user experience, but the path to adding voice controls to any product, service, or application is complex. As major companies continue to create voice-enabled interfaces, product designers, developers, and manufacturers will be forced to rethink the user experience and user interface. This report profiles the key technology partners that can help companies integrate voice and evaluates different strategies for implementation. This report includes a five-year forecast of voice technologies in the home.

Contents

1. REPORT SUMMARY

- 1.1 Purpose of Report
- 1.2 Key Burning Questions Addressed by this Research
- 1.3 Research Approach/Sources

2. VOICE AND THE SMART HOME: ADOPTION AND USE CASES
