Abstracts

Technology advances in data analytics, in modeling and mining unstructured data, are changing the way that consumers interact with products. Two-way voice and video analytics, combined with cognitive computing, are providing greater contextual awareness, enabling a new layer of highly personalized value-added service. This report discusses how technology is transforming the smart home user experience.

Contents

1. REPORT SUMMARY

- 1.1 Purpose of Report
- 1.2 Research Approach/Sources
- 1.3 Core Questions Answered
