Abstracts

This report analyzes key technologies supporting anywhere communications between doctor and patient, such as video consultation, online and mobile coaching, medication reminders, and social health community. The report focuses on profiling key technology enablers, business service platform developers, and communications service providers, highlighting their business models and projecting virtual care's potential as a new means of care delivery for healthcare stakeholders. It also provides a forecast of U.S. virtual care users from 2013-2018.

Contents
