### Global Breast Biopsy Devices Market

Breast cancer is the disease characterized by abnormal growth of cells in the breast tissue. Breast biopsy devices are used to diagnose breast cancer by removal of the sample from the breast tissue for the laboratory testing. The breast biopsy is preferred when the formation of lumps in the breast or abnormal change in nipples such as congealing, scaling, cellulite, or crusting of the skin. Various types of breast biopsy devices are preferred for the breast cancer diagnosis such as vacuum-powered biopsy, fine-needle aspiration, and core needle biopsy among others.

Increase in the global breast cancer prevalence rate, changes in lifestyle such as consumption of tobacco, alcohol and food habits, growing in the female population with hormonal imbalance, an increase in the breast cancer screening programs around the globe are anticipated to fuel the breast biopsy devices market over the forecast period. In addition, technological advancements with minimally invasive or non-invasive diagnostic procedure, favourable reimbursement policies, and rising investment by the companies for R&D activities are expected to boost the breast biopsy devices market. However, stringent regulatory guidelines, infections associated with the breast biopsy devices, and the high cost of the procedures are dampening the growth of Breast Biopsy Devices Market.

Breast biopsy devices market is growing at a significant CAGR over the forecast period. The breast biopsy is mandatory for the diagnosis of breast cancer which cannot be confirmed by breast mammograms. Increase in the global breast cancer incidences (according to World Cancer Research Fund International, about 1.7 Mn new cases were observed in 2012) propels the breast cancer devices market over the forecast period. Acquisitions and mergers, collaborations, patent approvals, and technological advancements are the key strategies followed by the companies for increasing their revenue in the breast biopsy devices market. For instance, in 2014, Leica Biosystems (Danaher Corporation) acquired Devicor Medical Products for strengthening its breast biopsy devices portfolio. Moreover, In January 2015, Intact Medical Corporation received FDA approval for the minimally-invasive breast biopsy device. In addition, fundraising by the start-up companies for the innovation of novel devices also propels

the breast biopsy devices market over the forecast period.

Geographically, breast biopsy devices market is segmented into Europe, Latin America, North America, Middle East & Africa, and Asia Pacific. North America has a lucrative growth in breast biopsy devices market owing to increase in the prevalence of breast cancer (according to Centre for Disease Control and Prevention 2014, about 236,968 women and 2,141 men were diagnosed with breast cancer in U.S.), technological advancements, and increase in healthcare expenditure in the region. Europe has a significant share owing to rise in prevalence of breast cancer majorly in Italy, Greece, Finland, Germany, and Netherlands where the prevalence rate is approximately more than 400 per 100,000 population. In addition, high adoption of novel technologies, development in healthcare infrastructure, changes in lifestyle, and government initiations to create awareness about breast cancer diagnosis programs are anticipated to fuel the breast biopsy devices market. Asia Pacific is an emerging region for the breast biopsy devices market due to rise in female geriatric population majorly in Japan, China, and India. Moreover, increase in per capita income, rise in awareness about the breast cancer diagnosis, and rise in R&D for developing the minimally invasive procedures are driving the breast biopsy devices market.

Some of the players in breast biopsy devices market are Medtronic, Inc. (Ireland), Becton, Dickinson and Company (U.S.), Hologic Inc. (U.S.), C.R. Bard, Inc. (U.S.), Planmed Oy (Finland), Scion Medical Technologies, LLC (U.S.), and Leica Biosystems (Danaher Corporation) to name a few.

In August 2017, Hologic has launched Brevera breast biopsy system for the real-time breast biopsy and verification
