Market Outline: Global Center Pivot Irrigation Systems Market

Center pivot irrigation is known as central pivot irrigation or circle irrigation or waterwheel irrigation. Center pivot irrigation method is crop irrigation method in which an equipment is rotated around the pivot by watering the crops with the help of sprinklers. Earlier, most of the center pivot systems are water powered while currently most of them are propelled by electric motors. Center pivot irrigation system was invented by Farmer Frank Zybach from Colorado in 1940. Center pivot irrigation system was recognized as most preferable method of enhancing distribution of water to the whole crop in the fields.
