Global Facial Rejuvenation Market

Facial rejuvenation is a combination of medical and cosmetic procedure that is carried out the youthful appearance to the human face. Facial rejuvenation is carried by either minimally invasive or non-invasive treatment which aims to restore skin elasticity and enables maintain a youthful appearance in the neck and face region. Facial rejuvenation plays a vital role in skin protection from sun damage. In young ages, human naturally defend their bodies from sun damage by neutralization of free radicals which are reactive oxygen atoms damage the skin's collagen. However, human bodies lose the resistance towards ultra violet radiations in older age. The signs of sun damage include wrinkles, enlarged pores, sagging skin, freckling or spotting and spider veins. Many treatments such as microabrasion, dermabrasion, topical creams, chemical peels, dermal fillers, and cosmetic surgery are available for the protection of skin from sun damage.

The global Facial Rejuvenation market is expected to grow at a significant CAGR due to increase in the global population. Rise in the disposable income levels, lifestyle changes, early onset of aging, and increasing adoption of minimally invasive or non-invasive surgical rejuvenation procedures expected fuel the facial rejuvenation market. Furthermore, simple procedures for the treatments, rise in the affordability, availability of beauty products in the market, and shorter treatment duration by patients also boost the facial rejuvenation market over the forecast period. However, lack of properly trained professionals, limited documented evidence of clinical effectiveness, and the implementation of international regulatory mandates for the standardization of cosmetic procedures are the major bottle necks for the growth of facial rejuvenation market over the forecast period.
