Market Dynamics: Global Poultry Feed Market

Poultry feed refers to the food for poultry farm, that includes ducks, chickens geese and other domestic birds. Healthy growth of the poultry requires the sufficient essential nutrients in right amount and proportion required. Global feed market is projected to grow at significant rates owing to the factors such as rise in demand for the meat coupled with the widespread of poultry diseases. In addition, rise in demand for the healthy protein diet has led to increase in demand for the poultry products. Furthermore, growth in the poultry business in developed and developing countries of the world projected to boost the poultry feed market share over the forecast period. Moreover, introduction of the new poultry feeds and feed additives for improving the health and provide efficient nutrients for the poultry are expected to boost the market share furthermore. However, growth in cost of raw materials, lack of awareness in poultry farmers about the new products and high maintenance costs are expected to hamper the market growth over the forecast period.
