Being considered as the biological insurance, stem cells offer limitless possibilities, such as tissue growth of vital organs like liver, pancreas; and treating patients with heart problems, diabetes, cancer, genetic and cardiovascular diseases. In the human body, major sources of stem cells are bone marrow, cord blood, embryonic cells, dental pulp and menstrual blood. Increasing number of stem cell banks coupled with growing government investments in stem cell research portrays a positive picture for stem cells market in India. With high birth rate and comparatively less stringent rules and regulations, India is emerging as a perfect destination for various global stem cell banking companies. Consequently, the stem cell market in the country is expected to witness robust growth in the coming years.

According to “India Stem Cells Market Forecast & Opportunities, 2020”, stem cells market in India is anticipated to grow at a CAGR of over 28% during 2015 - 2020. In terms of services offered, stem cells market in India has been segmented into two categories, namely, stem cell banking and stem cell research. Among these two categories, stem cell research dominated the market in 2014, and is anticipated to continue its dominance through 2020. Adult stem cells accounted for the majority share in India’s stem cells market in 2014 on account of a lot of research being carried out using adult stem cells, coupled with growing adult stem cell banking and associated applications in therapeutics. Region-wise, South India dominated the country’s stem cells market in 2014, due to easy availability of a large number of skilled medical professionals and growing medical tourism in this region. “India Stem Cells Market Forecast & Opportunities, 2020” report elaborates following aspects related to stem cells market in India:
