Abstracts

The China chip resistor market is expected to grow at a CAGR of around 8.1% during 2023-2030. This report on China chip resistor market report provides holistic understanding of the market along with market sizing, forecast, drivers, challenges, and competitive landscape. The report presents a clear picture of the China chip resistor market by categorising the market based on various segments including detailed regional segmentation. Also, detailed profiles of companies operating in the China chip resistor market are provided in this report, which includes company description, business overview, product portfolio, and financial details.

This report provides an in-depth analysis of overall market and its segments. The historic numbers and forecasts are provided for each of the segments and for the countries covered in the report. This report also includes a detailed impact of COVID-19 pandemic on the China chip resistor market.

Apart from the quantitative analysis, the report also provides qualitative analysis, including SWOT analysis, porter's five forces, and value chain of the industry. It also includes descriptive market drivers, opportunities, on-going & future trends, and challenges.

We believe that this report will aid the professionals and industry stakeholders in making informed decision.

Historical & Forecast Period

Base Year: 2022

Historical Period: 2018-2022

Forecast Period: 2023-2030

Market by Type:

Thick Film

Thin Film

Others

Market by End Use:

Automotive & Transportation

Consumer Electronics

Industrial

IT & Telecommunication

Others

Region covered in the report:

Guangdong

Jiangsu

Shandong

Zhejiang

Henan

Rest of China

Companies included in this report:

Rohm

Yageo

KOA Corporation

Tzai Yuan Enterprise Co.

China Zhenhua Group

Panasonic

Samsung Electro-Mechanics

Bourns

TE Connectivity

AVX

Ohmite

*This list is not exhaustive.

Research Methodology:

During the course of the research study, we conducted extensive primary and secondary research on the China chip resistor. The research commenced with extensive exploration through secondary sources followed by primary research. With these research methods, we were able to estimate the market size, to identify the factors that promote the growth in this market as well as the factors that hamper growth in the market.

Comprehensive primary and secondary methods helped us to identify trends in the

market and to project the opportunities that the key players may get during the forecast period. Apart from these approaches, various analytical and statistical approaches were also used during data extraction cleaning, and analysis.

Post secondary & primary research, we conducted expert interviews to validate all the information we collected during the course of the study. So, a blend of these three-way approaches helped us in data triangulation and to provide accurate market scenario in our report.

Key Highlights of Report:

Overview of China chip resistor market.

Analysis of China market trends, historical data, market estimates for the base year, and projections of compound annual growth rates (CAGRs) through the forecast period

Profiles of the key companies

SWOT analysis, Porter's five forces, and value chain analysis of gin market

Key Questions Answered in the Report:

What will be the China chip resistor market size and the growth rate in the coming year?

What are the main key factors driving the market?

What are the key market trends impacting the growth of the market?

What are the market opportunities and threats in the market?

What industrial trends, drivers and challenges are manipulating its growth?

Which are trending factors influencing the market shares of the top regions across the China?

Who are the key market players in the industry?

What is the degree of competition in the industry?

What is the impact of Covid19 on the current industry?
