Abstracts

The global cross laminated timber market is expected to grow at a CAGR of around 14.3% during 2023-2030. This report on global cross laminated timber market report provides holistic understanding of the market along with market sizing, forecast, drivers, challenges, and competitive landscape. the report presents a clear picture of the global cross laminated timber market by segmenting the market based on application, product type, element type, raw material type, bonding method, panel layers, adhesive type, press type, storey class, application type and region. Also, detailed profiles of companies operating in the cross laminated timber market are provided in this report. We believe that this report will aid the professionals and industry stakeholders in making informed decision.

Market Drivers

Expanding Building Activity

Cost-Effective

Environmentally Beneficial Since it Generates Less Greenhouse Gases

Market Challenges

Mediocre Fire and Moisture Resistance
