### **4,6-Di-tert-Butyl-o-cresol Market Summary**

#### **Introduction**

4,6-Di-tert-Butyl-o-cresol is a phenolic compound primarily employed as a rubber antioxidant and an intermediate in fragrance production. As a rubber antioxidant, it prevents oxidative degradation, extending the lifespan of rubber products such as tires, seals, and industrial components. In the fragrance industry, it acts as a precursor for synthetic musks and other aromatic compounds used in personal care and household products. The 4,6-Di-tert-Butyl-o-cresol market is a niche segment within the specialty chemicals industry, defined by its reliance on downstream demand from rubber and fragrance manufacturers. The production process requires precise alkylation to ensure high purity, and the industry faces regulatory oversight due to environmental and health concerns associated with phenolic compounds.

The market is driven by key players such as SI Group, Shandong Siondon New Materials Technology Co. Ltd., Jiye Holding Group, and Nanjing Datang Chemical Co. Ltd. Notably, Shandong Siondon launched an 850-ton capacity facility in 2024, reflecting efforts to meet rising demand. The global 4,6-Di-tert-Butyl-o-cresol market is projected to reach USD 8-16 million by 2025, with a CAGR of 2.8%-5.0% through 2030. This growth is supported by steady demand in rubber antioxidants and fragrances, moderated by production challenges and competition from alternative compounds.

#### **Market Size and Growth Forecast**

The global 4,6-Di-tert-Butyl-o-cresol market is anticipated to achieve a valuation of USD 8-16 million by 2025, with a CAGR ranging from 2.8% to 5.0% from 2025 to 2030. This growth is driven by consistent demand for rubber antioxidants in automotive and industrial applications, where durability is essential, alongside stable use in the fragrance sector for personal care products. The market benefits from ongoing industrial activity and the need for reliable stabilizers, though expansion is constrained by its niche scope, high production costs, and the availability of substitute antioxidants and synthetic musks. The forecast reflects a balanced outlook, with steady industrial demand offset by regulatory and competitive pressures.
