## **Abstracts**

### **Gaming Coins Market Summary**

#### **Introduction**

Gaming Coinss, or cryptocurrencies tied to gaming ecosystems, power virtual economies in collectible, open-world, and role-playing games within the Web3 and GameFi space. Originating in the 1950s, video gaming has evolved into a USD 185 billion industry in 2022, with 3.2 billion players, projected to reach USD 210 billion and 3.5 billion players by 2025. Integrating token economics into blockchain-based games adds complexity, aiming to attract mainstream players while facing adoption hurdles. Tokens like Decentraland's MANA, Sandbox's SAND, and Axie Infinity's AXS drive in-game transactions, ownership, and rewards. Regulatory crackdowns, such as bans on converting game coins to fiat currency, shape the market, yet GameFi's proximity to tangible use cases suggests significant growth potential within the broader crypto landscape.

The global Gaming Coins market tied to gaming is estimated at USD 12 billion to USD 15 billion in 2025, with a CAGR of 15% to 20% through 2030, potentially reaching USD 30 billion to USD 40 billion. Growth is fueled by gaming adoption and blockchain integration.
