Medical Disinfectant Wipes Market Summary

Introduction and Market Overview

Medical disinfectant wipes, vital for preventing healthcare-associated infections (HAIs) affecting 7 million patients annually, are indispensable in hospitals, ICUs, and dialysis centers due to their portability and broad-spectrum efficacy. The COVID-19 pandemic significantly heightened hygiene awareness, spurring wipe usage in healthcare facilities and households. With 60% of healthcare services consumed by the elderly, projected to reach 2 billion by 2050, wipes address infection risks in chronic disease patients. Environmental concerns drive demand for biodegradable wipes, with 60% of consumers preferring sustainable options like Lysol's plant-based products. The global middle class, expected to reach 5.6 billion by 2030, fuels demand for premium, eco-friendly wipes. The global medical disinfectant wipes market is estimated at USD 3.0-5.0 billion in 2025, with a CAGR of 8%-13% through 2030, driven by infection control needs, aging populations, and sustainability trends.
