Migraine Drugs Market Summary

Introduction and Market Overview

Migraine drugs, including CGRP inhibitors, triptans, and neurotoxins, address a prevalent neurological disorder affecting 1 billion people globally, with a 14% prevalence rate, particularly impacting women (18% vs. 10% in men). The market is driven by the significant disability burden, with migraines causing 2.2% of global disease burden, and the advent of CGRP-based therapies, which reduce attack frequency by over 50%. Lifestyle factors like stress, sleep deprivation, and dietary triggers exacerbate migraines, while improved diagnosis and female-specific treatments boost demand. The global migraine drugs market is estimated at USD 4.0-7.0 billion in 2025, with a CAGR of 8%-13% through 2030.
