## **Abstracts**

### **Porcine Plasma Feed Market Overview**

The porcine plasma feed market is experiencing steady growth as this high-quality protein source becomes increasingly valued in animal nutrition, especially in the pet food and aquafeed industries. Derived from the blood plasma of pigs, porcine plasma is rich in essential proteins, peptides, and growth factors, making it a vital ingredient in animal feed formulations. The demand for porcine plasma feed is being driven by the growing global appetite for sustainable and nutritionally balanced feed solutions for pets, aquaculture, and livestock. Its ability to enhance animal growth and immunity further supports its adoption across various sectors.

### **Market Size**

The market for porcine plasma feed is projected to expand with a compound annual growth rate (CAGR) ranging from 5% to 7% over the forecast period. Increasing awareness about the benefits of porcine plasma in promoting animal health and improving feed conversion rates is expected to drive market expansion. Additionally, as the demand for premium and highly nutritious feed ingredients increases globally, porcine plasma is likely to witness broader adoption.
