Abstracts

A baby monitor is a device used to remotely listen to sounds made by a baby as well as track its movements. It comprises transmitter and a microphone. The baby monitor industry witnessed consistent growth since past few years. These monitors are most popular in the developed countries, such as U.S., Canada, and Western Europe. Introduction of high-end baby monitors with advanced features and improved online retailing have propelled the growth of the market in these regions.

The global baby monitors market is segmented based on type, mode of connection, and geography. Based on type, baby monitors are categorized as audio and video baby monitors. Market is categorized as wired and wireless baby monitors depending on mode of connection. Wireless baby monitors offer the advantage of portability as well as ease of installation and connection as these can be easily connected to WLAN. The global baby monitors market is analyzed based on geographical regions, which include North America, Europe, Asia-Pacific, and LAMEA.
