Global Boom Sprayers Market Overview:

The global boom sprayers market is expected to reach \$3,963 million in 2025, from \$2,575 million in 2016, growing at a CAGR of 5.1% from 2017 to 2025. A sprayer is a device used to spray pesticides, insecticides, fertilizers, and others on the crop to obtain a better yield. The boom sprayer is a pipe with a nozzle attached to it, which helps in evenly spraying the fertilizers on the crops. These sprayers offer several advantages such as they are easy to operate & handle and possess the ability to spread chemicals uniformly at the desired level. In addition, they are easily available in the market at a reasonable price.

Recently, the use of automatic boom sprayers has grown significantly in the agricultural sector, as they save time and offer high productivity by efficient protection of crops from fungus and bacteria. Moreover, increase in global population, deficiency in soil nutrition, and reduced risk of exceeding a minimum residue level have fostered the growth of the global boom sprayers market. However, lack of awareness among farmers towards boom sprayers is expected to impede the market growth.

Based on product, the global boom sprayers market is segmented as carbon fibre boom, steel fibre boom, and others. Based on application, the market is segmented as garden, lawn, field, and others. Geographic breakdown and deep analysis of each of the aforesaid segments is included for North America, Europe, Asia-Pacific, and LAMEA.

Market Dynamics:

Drivers:

Increased global population

Deficiency in soil nutrition foster adoption of boom sprayers

Reduced risk of exceeding a minimum residue level

Restraints:

Lack of awareness about equipment among small farmers

Market Players:

The top players in the global boom sprayers market include AGCO, STIHL, Deere & Company, Case IH, Ag Spray Equipment, Buhler Industries, Demco, Equipment Technologies, Great Plains, and Hardi International.
