## Abstracts

A bullet proof jacket or bullet proof vest is a type of personal armor that protects the human body from an impact of firearm-fired projectiles and shards or shrapnel from explosion. It is available in two types—soft and hard vest. A soft vest is a multi-layered wearable made of woven or laminated fibers and can protect a human body from shotgun and handgun projectiles. These jackets have ballistic plate such as metallic or ceramic plate, implanted on them to provide additional protection against external attacks from riffles-firings or knives. Nanomaterials are being implanted currently into body armor production which results in reduced weight of the armor and more rigidity to prevent the impact of projectiles.

Based on product type, the bullet proof jacket market is segmented into soft vest and hard vest. By end user bullet proof jacket market is divided into defense, law enforcement, and civilians. The market is further analyzed across four geographic regions including North America, Europe, Asia-Pacific, and LAMEA.

### MARKET DYNAMICS:

Drivers:

Growing security threats both internal and external.

Increase in investments for defense and other security mechanism by government.

Focus towards protection of soldiers and civilians.

Technological advancements such as implementation of nanoparticles in the body armor.

#### Restraints:

High costs of bullet proof jackets.

Firm regulatory framework.

#### **MARKET PLAYERS:**

The key industry leaders in the global bullet proof jacket market include Honeywell International Inc., U.S. Armor Corporation, E.L Dupont DE Nemours & Co., Point Blank Enterprises Inc, Wenzhou Start Co Ltd, EnGarde, MKU Limited, Infidel Body Armor, MARS Armor, Armourshield Ltd, Vestguard UK, BulletSafe, and Compass International Corp. Ltd.
