Abstracts

An LNG terminal is a facility made for regasifying the LNG gas transported by containers. Large-scale LNG terminals are mainly used where the demand and requirements of LNG are high. The LNG can be transported to these terminals through heavy cargo ships having huge capacity LNG containers or via pipelines. A conventional large-scale LNG terminal consists of four functions of berthing of LNG tankers and unloading or reloading of cargoes, storage of LNG in cryogenic tanks (?160°C), regasification of LNG, and sending out this gas into the transmission grid. LNG is the cleanest fuel compared to its counterparts because of its low environmental impact, no emission of soot, dust or fumes, and reduction in the emission of greenhouse gases, which make it a more desirable fuel. The global large-scale LNG terminal market is expected to grow at a CAGR of 5.8% from 2017 to 2025.

The global large-scale LNG terminal market is segmented based on technology and geography. Technology-based classification of the large-scale LNG terminal market yields liquefaction and regasification. Liquefaction and regasification technology is further bifurcated as onshore and offshore, respectively. Geographic breakdown and deep analysis of each of the aforesaid segments have resulted in the following regions: North America, Europe, Asia-Pacific, and LAMEA.

MARKET DYNAMICS:

Drivers:

Stringent rules and regulations from governing agencies regarding environmental impact is expected to drive the market

for large-scale LNG terminal.

Restraints:

Irregularity in extraction and processing has hampered growth of the large-scale LNG terminal market.

Competition with mature substitutes, which have widespread application in various industries is projected to slowdown the market during the forecast period.

MARKET PLAYERS:

The top players in the global large-scale LNG terminals market include Royal Dutch Shell PLC, Exxon Mobil Corporation, Santos Ltd., Linde AG, Chevron Corporation, Petroliam Nasional Berhad (PETRONAS), Statoil ASA, ConocoPhillips Co., Gasum Oy, and Rosneft.
