Abstracts

Meat substitutes are products that resemble actual meat in terms of taste, flavor, and appearance but are healthier than meat. These products are being primarily consumed by individuals who avoid products with cholesterol and fat. Such products are increasingly being used as substitutes for regular meat and meat products. The global Meat Substitute market is expected to grow at a CAGR of 8.4% from 2017 to 2025.

The global meat substitute market is segmented by type, source, and category. By type the market is divided into tofu-based, tempeh-based, textured vegetable protein-based, quorn-based, seitan-based, and others. Soy, wheat, mycoprotein, and others are the further segmentations of source. Frozen, refrigerated, and shelf-stable are the various classifications of the category segment. Geographic breakdown and deep analysis of each of the aforesaid segments is included for North America, Europe, Asia-Pacific, and LAMEA.
