Abstracts

An mPOS performs a role of an electronic point-of-sale terminal, or a cash register, in wireless devices such as tablets and smartphones. mPOS operations allow sales and service industries to execute timely financial transactions and improve the customer experience. mPOS also offers an extensive scope of autonomy in the movement of merchandise and the level of customer satisfaction is greater than that for conventional payment methods. The global mobile point-of-sale (mPOS) market is expected to grow at a CAGR of around 38% from 2017 to 2025.

Based on solution, the market is divided into integrated card reader solutions and card reader accessories. Based on technology, the mPOS market is sub-divided into EMV chip and pin, hybrid technology solutions, chip and sign, biometrics, near field communication, and magnetic-stripe. According to the end-user industry, the market is categorized into retail, healthcare, hospitality, entertainment, transportation, government, consumer utility services, and others. Geographic breakdown and deep analysis of each of the aforesaid segments is included for North America, Europe, Asia-Pacific, and LAMEA.

MARKET DYNAMICS:
