Abstracts

With the increase in urbanization, the global monorail systems market has witnessed growth over the years. Monorail system is an advanced mode of transportation that runs on a single rail and offers solutions for urban transportation. However, the adoption of such system has been observed in amusements, for sightseeing, and agricultural purpose as they possess less space, commonly elevated and cost less than light rail systems.

The market is segmented on the basis of type, propulsion, size and geography. Based on type, the market is divided into straddling monorail and suspended monorail. By propulsion, the market is categorized into electric monorail system and maglev monorail system. On the basis of size, the global industry is broadly classified into small segment, medium segment and large segment. Geographically, the global market is analyzed across North America, Europe, Asia-Pacific and LAMEA.

MARKET DYNAMICS:

Drivers:

Low installation cost
