Abstracts

There are various benefits of a highly capable radar security system for security and surveillance applications such as perimeter security, border protection, airport perimeter protection, base protection, oil and gas, and other important infrastructure sites including harbors and ports. Radar security system provides early warning and gives time to develop a response to a risk at the same time as reducing some of the need for solid barriers and wire fences and other formal security controls. The global radar security market is expected to grow at a CAGR of 6.5% from 2017 to 2025.

Based on product type, the market is segmented into ground surveillance radar systems, air surveillance radar systems, and marine surveillance radar systems. Based on range, the market is classified into long range, medium range, and short range. On the basis of application, the market is segmented as border security, seaport and harbor, important infrastructure, and others. Geographic breakdown and deep analysis of each of the aforesaid segments is included for North America, Europe, Asia-Pacific, and LAMEA.

MARKET DYNAMICS:
