Roof Tile Market Overview:

Roof tiles provide efficient roofing solutions for residential as well as commercial infrastructure. Further, they also enhance the visual aesthetics of building design through varying tiles colors, designs, and their placement over the roof. The global roof tile market was valued at \$17,897.46 million in 2016, and is projected to reach \$32.943.34 million by 2025, growing at a CAGR of 7.19% from 2017 to 2025.

Increase in consciousness towards home remodeling and creative building designs and growing need for efficient insulation of buildings drive the market. Roof tile is an ideal choice for consumers, owing to their efficient insulation capabilities and enhanced visual appeal. Furthermore, roof tiles facilitate rain water harvesting with minimal changes in the building infrastructure. Thus, factors such as rise in construction industry and rapid urbanization especially in fast emerging economies are expected to drive the market growth. However, growing popularity of residential buildings and complexities of terrace roofs are expected to hinder the market growth during the forecast period.

Based on type, the market is segmented into clay roof tile, cement roof tile, ceramics roof tile, fiber cement roof tile, and zinc A/L roof tile. By application, the market is divided into residential, commercial, industrial, and infrastructure. Based on region, it is classified into North America, Europe, Asia-Pacific, South America, and Middle East & Africa.
