Though MMDI market, which rarely saw fluctuations in previous years, is considered as stable in 2009, the global financial crisis, downstream industry shuffling, and newly-emerged capacities, as well as the rapidly-changing import and export market did bring local MMDI some changes beneath the superficial stability; also, the competition of producers in China had been put forward: NPU successfully settled at North China, Bayer vied for bigger market share at East China… the report herein will give you detailed analysis of MMDI market in 2009, based on in-depth data analysis.
