Here, we express our thanks for the support and assistance from Lignin and Lignin-Based Products industry chain related technical experts and marketing engineers during Research Team's survey and interviews. Explanation:

To lignin, there are many kinds of lignin-based products, among them the lignosulphonates and Kraft lignin play a key role with a wide range of applications. To the lignosulphonates, the sodium lignosulfonate and calcium lignosulfonate are the most widely used lignin-based products. The Kraft lignin products production is approximately 90,000 tons this year with a relatively small market share compared to the lignosulfonates.

In this report, we mainly analyze the lignosulphonates and Kraft lignin, including sodium lignosulfonate products, calcium lignosulfonate products, magnesium lignosulfonate products and Kraft lignin etc.
