## Abstracts

'2015 Global and China Charging Pile Industry Market and Investment Analysis Report' is a professional and deep research report in this filed.

For overview analysis, the report introduces Charging Pile basic information including definition, classification, application, industry chain structure, industry overview, policy analysis, and news analysis, etc.

With the great development speed of new energy electric vehicles, in the worldwide, the sales of electric vehicles keep fast increase, in the worldwide promoting environmental protection and low-carbon economic policy, the new energy electric vehicles will be developed, and in the China, different country give different policy to support the new energy electric vehicles, like vehicles allowance, tax subsidies, vehicle without yaohao and so on, so the development prospect will also be optimistic, even though most country can't achieve their targets. The charging piles as the matching facility of new energy electric vehicles plays an important role in the development of new energy electric vehicles, both complement each other, so in the good tendency of new energy electric vehicles, the charging piles industry will be a good tendency, the State Grid has also has liberalized the private sector charge pile construction and public spheres, it hopes individuals and the third parties can actively engaged in infrastructure construction in the past.

From 2010 to 2015, the output has great increase, the worldwide output of the new energy vehicles is 4.22, 5.07, 7.96, 15.95, 40.79, 122.85 and the output of China is 0.76,0.84,1.26,1.75,8.39,7.85 (unit: ten thousand), the new energy vehicles has a great increase from 2014 from the 2014 data, it mainly due to the strong support of domestic policy making yields of new energy electric vehicles presents a huge growth, however,

from the first half year of 2015 date, the number has almost exceed the 2014 whole year in China, even more gratifying is that sales of new energy electric vehicles typically greater than 95%, even more than 100% in some cases months, so the new energy vehicles don't exist the stock problems, the number and the distribution of charging piles is particularly important because the mileage of the new energy vehicles are greatly restricted by the battery technology issues. From market research data, firstly, the charging piles are far from the number of the new energy electric vehicles, only about 25% of the number of existing charging pile about new energy electric vehicles, furthermore, the distribution of the charging pile is also not reasonable, at last, the industry standard also hasn't been formulated, there hasn't a unite standard in the worldwide.

The new electric vehicles charging piles industry market and investment analysis report is aiming to charging piles deep research report, the report is by analysis the new energy electric vehicles output of 2010-2015 to speculate the demand of charging pile, we speculate the future tendency of charging pile from the new energy electric vehicles development prospect, this report has also aim to the charging pile distribution in the different city and the different manufacture, Finally the feasibility of new investment projects are assessed and overall research conclusions offered.

This report also presents Charging Pile product specification, manufacturing process, and product cost structure etc. Production is separated by regions, technology and applications. In the end, the report includes Charging Pile new project SWOT analysis, investment feasibility analysis, investment return analysis, and development trend analysis.

In conclusion, it is a deep research report on global Charging Pile industry. Here, we express our thanks for the support and assistance from Charging Pile industry chain related technical experts and marketing engineers during research team's survey and interviews.
