Abstracts

According to the raw material difference, needle coke is divided into petroleum-based and coal-based. Globally, conocoPhillips is the biggest manufacturer of petroleum-based needle coke and C-Chem is the biggest manufacturer of coal-based needle coke. In China, there are only two petroleum needle coke manufacturers in China, including CNPC Jinzhou Petrochemical and Shandong Yida New Material. Shandong Yida New Material started production since August 8th, 2017. Production base of those two suppliers are separately in Liaoning and Shandong province.

China has huge demand for needle cokes since it is the largest steel producer in the world. During past five years, China import rate was about 50%. China has smaller amount of needle coke enterprises which feature weak technological base and are huddled by the uncertainty of stable production and product quality. During 2012-2017, China needle coke consumption varied from 64.2 K MT in 2012 to 68.8 K MT in 2017. China production varied from 25.2 K MT in 2012 to 54.3 K MT in 2017, with a CAGR of 16.59%.

This report studies the petroleum needle coke development status and future trend in China, focuses on top players in China, also splits petroleum needle coke by type and by applications, to fully and deeply research and reveal the market general situation and future forecast.
