## Abstracts

Chassis Module is a part unit to benefit automakers by integrating the relevant parts among the ones comprising the framework of the lower part the vehicle. The Chassis Module is the secondary module of the vehicle electrical system, and acts as a slave to the Bulkhead Module. The Chassis Module is mounted to the bracket that holds the transmission control unit on the outside of the left-hand frame rail just behind the front wheel well.

Since the COVID-19 virus outbreak in December 2019, the disease has spread to almost 100 countries around the globe with the World Health Organization declaring it a public health emergency.
