## Abstracts

A center cap or center cap is a decorative disk on an automobile wheel that covers a central portion of the wheel. Early center caps for automobiles were small and primarily served the purpose of keeping dirt away from the spindle nut and wheel bearings of vehicles. Often a center cap will bear the logo or trademark of the maker of the automobile or the maker of the center cap, but there are custom center caps without any trademark as well. Early center caps were often chrome plated.
