Abstracts

Avalanche Backpack is safety gear designed to prevent the wearer from being buried while skiing and mountaineering. In an avalanche, larger objects rise to the surface, while smaller objects sink to the bottom. An airbag system incorporated into a backpack, with a large balloon or balloons that inflates at the pull of a cord, is designed to make the person wearing it larger so that they naturally rise to the surface of the snow.

Since the COVID-19 virus outbreak in December 2019, the disease has spread to almost 100 countries around the globe with the World Health Organization declaring it a public health emergency. The global impacts of the coronavirus disease 2019 (COVID-19) are already starting to be felt, and will significantly affect the Avalanche Backpack market in 2020.

COVID-19 can affect the global economy in three main ways: by directly affecting production and demand, by creating supply chain and market disruption, and by its financial impact on firms and financial markets.

The outbreak of COVID-19 has brought effects on many aspects, like flight cancellations; travel bans and quarantines; restaurants closed; all indoor events restricted; over forty countries state of emergency declared; massive slowing of the supply chain; stock market volatility; falling business confidence, growing panic among the population, and uncertainty about future.

This report also analyses the impact of Coronavirus COVID-19 on the Avalanche Backpack industry.
