Abstracts

Barium Hydroxide Monohydrate is a preferred source of barium for special and high purity syntheses and processes in the electronic, optical and pharmaceutical industry. It is mainly used as the additive for the lubricant of internal-combustion engine. It is a kind of superfinished multi-purpose additive for barium-based grease and oil. It can also be used for beet sugar fabrication and medicine. It is the raw material of plastic and rayon. It can be used as resin stabilizer. It is suitable for organic synthesis and other barium salt fabrication, demineralization of water, glass and porcelain enamel industries. Since the COVID-19 virus outbreak in December 2019, the disease has spread to almost 100 countries around the globe with the World Health Organization declaring it a public health emergency. The global impacts of the coronavirus disease 2019 (COVID-19) are already starting to be felt, and will significantly affect the Barium Hydroxide Monohydrate market in 2020.

COVID-19 can affect the global economy in three main ways: by directly affecting production and demand, by creating supply chain and market disruption, and by its financial impact on firms and financial markets.
