Abstracts

BB Guns (or BBs, normally Airsoft guns), are replica toy weapons used in airsoft sports. They are a special type of very low-power smoothbore airguns designed to shoot non-metallic spherical projectiles often colloquially (and incorrectly) referred to as 'BBs', which are typically made of (but not limited to) plastic or biodegradable resin materials. Airsoft gun powerplants are designed to have low muzzle energy ratings (generally less than 1.5 J, or 1.1 ft.lb) and the pellets have significantly less penetrative and stopping powers than conventional airguns, and are generally safe for competitive sporting and recreational purposes if proper protective gear is worn.

Many of the best-selling airsoft guns are highly detailed replicas of real firearms, which are manufactured and designed by companies headquartered in East Asia such as Japan, Taiwan, South Korea, Hong Kong and China, however, European and North American brands exist also.

A subculture of high performance airsoft guns has created a big influence globally. Many traits are high fire rate, far distance reach, consistent and accurate firing. These features are not common on most retail airsoft guns and often so prices for these products tend to be very costly.

Since the COVID-19 virus outbreak in December 2019, the disease has spread to almost 100 countries around the globe with the World Health Organization declaring it a public health emergency. The global impacts of the coronavirus disease 2019 (COVID-19) are already starting to be felt, and will significantly affect the BB Guns market in 2020.

COVID-19 can affect the global economy in three main ways: by directly affecting production and demand, by creating supply chain and market disruption, and by its financial impact on firms and financial markets.

The outbreak of COVID-19 has brought effects on many aspects, like flight cancellations; travel bans and quarantines; restaurants closed; all indoor events

restricted; over forty countries state of emergency declared; massive slowing of the supply chain; stock market volatility; falling business confidence, growing panic among the population, and uncertainty about future.

This report also analyses the impact of Coronavirus COVID-19 on the BB Guns industry.

Based on our recent survey, we have several different scenarios about the BB Guns YoY growth rate for 2020. The probable scenario is expected to grow by a xx% in 2020 and the revenue will be xx in 2020 from US\$ xx million in 2019. The market size of BB Guns will reach xx in 2026, with a CAGR of xx% from 2020 to 2026.

With industry-standard accuracy in analysis and high data integrity, the report makes a brilliant attempt to unveil key opportunities available in the global BB Guns market to help players in achieving a strong market position. Buyers of the report can access verified and reliable market forecasts, including those for the overall size of the global BB Guns market in terms of both revenue and volume.

Players, stakeholders, and other participants in the global BB Guns market will be able to gain the upper hand as they use the report as a powerful resource. For this version of the report, the segmental analysis focuses on sales (volume), revenue and forecast by each application segment in terms of sales and revenue and forecast by each type segment in terms of revenue for the period 2015-2026.

Production and Pricing Analyses

Readers are provided with deeper production analysis, import and export analysis, and pricing analysis for the global BB Guns market. As part of production analysis, the report offers accurate statistics and figures for production capacity, production volume by region, and global production and production by each type segment for the period 2015-2026.

In the pricing analysis section of the report, readers are provided with validated statistics and figures for price by manufacturer and price by region for the period 2015-2020 and price by each type segment for the period 2015-2026. The import and export analysis for the global BB Guns market has been provided based on region.

Regional and Country-level Analysis

The report offers an exhaustive geographical analysis of the global BB Guns market, covering important regions, viz, North America, Europe, China, Japan, Taiwan Region and Korea.
