## Abstracts

Biomedical Adhesives and Sealants mainly refer to adhesives and sealants used for biomedical applications. Adhesives and sealants in this study cover synthetic products such as cyanoacrylates, polyethylene glycol, and acrylates, along with their natural counterparts such as collagen, fibrin, and albumin.

Since the COVID-19 virus outbreak in December 2019, the disease has spread to almost 100 countries around the globe with the World Health Organization declaring it a public health emergency. The global impacts of the coronavirus disease 2019 (COVID-19) are already starting to be felt, and will significantly affect the Biomedical Adhesives and Sealants market in 2020.

COVID-19 can affect the global economy in three main ways: by directly affecting production and demand, by creating supply chain and market disruption, and by its financial impact on firms and financial markets.

The outbreak of COVID-19 has brought effects on many aspects, like flight cancellations; travel bans and quarantines; restaurants closed; all indoor events restricted; over forty countries state of emergency declared; massive slowing of the supply chain; stock market volatility; falling business confidence, growing panic among the population, and uncertainty about future.
