## Abstracts

Bulk receiving and feeding machine is widely used in various fields, food industry, chemical industry, pharmaceutical industry, plastic industry, and environmental industry. Different bulk materials have different fluidity, depending on material properties or material geometry. Therefore, it is impossible for a single feed scale to meet the characteristics and capacity requirements of all different materials. Material types also include many types, such as good fluidity material, flow material, poor fluidity material, sticky material, fragile material, etc.

Since the COVID-19 virus outbreak in December 2019, the disease has spread to almost 100 countries around the globe with the World Health Organization declaring it a public health emergency.
